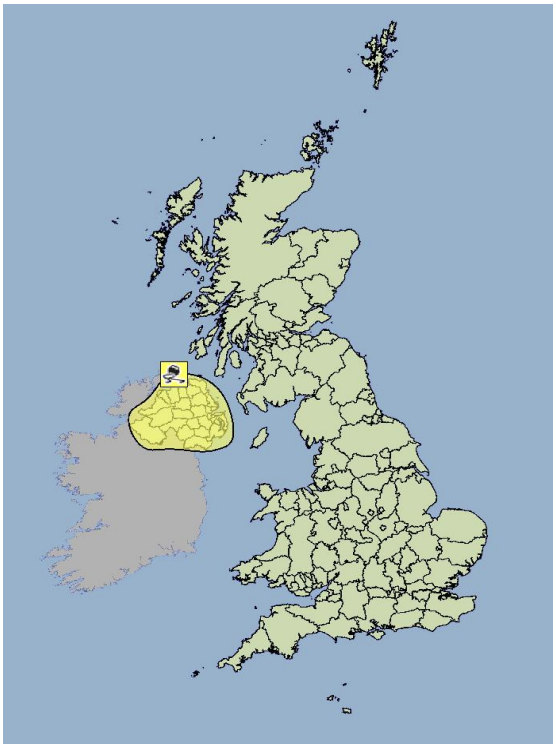
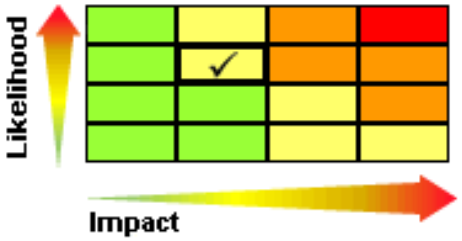
National Severe Weather Warning Service





Chief Forecasters Assessment
An active frontal system will bring rain into Northern Ireland in the early hours of Sunday. Following the recent very cold spell, many surfaces will be below freezing leading to icy patches. In addition some sleet or wet snow is likely for a time, mainly over high ground. Temperatures will recover slowly during Sunday morning.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **01:00 on Sun, 21st Jan 2018** until **09:00 on Sun, 21st Jan 2018**

Outbreaks of rain spreading eastwards across Northern Ireland in the early hours of Sunday are likely to fall onto freezing surfaces following the recent very cold spell.

Icy patches on some untreated roads, pavements and cycle paths are probable. This could lead to some injuries from slips and falls on icy surfaces.
